EDUCATION

Study Program

The Odin Projects

06/2023 - 11/2023

Courses

- Full Stack Web Development with React, Node.js, Express.js and MongoDB.

PERSONAL PROJECTS

Personal Blog (10/2023 - 10/2023)

- For this project I've build my own RESTful API using Express.js and used it in my React frontend to fetch blog posts from a MongoDB server.

League Helper (11/2023 - 12/2023)

- My passion project for League of Legends players. By making calls to Riot Games' API, the app shows some fun statistics about your recent games. It also uses a Redis server to cache user data.

Battleship (08/2023 - 08/2023)

- A classic game of Battleship, made in vanilla JavaScript.

Where's the turtle? (11/2023 - 11/2023)

- Variation on "Where's Waldo?" game, with TMNT characters. React frontend and Express.js with MongoDB on the backend to save gamestate and best results

WORK EXPERIENCE

Paralegal

GR-Group

10/2019 - 06/2023

Moscow, Russia

My job involved assisting the legal department by representing the company's interests in courts, tax authorities, and other services.
